

Political Appointments that doom the world? The clear act of a sick man?

DOES TRUMP have INCURABLE Late-Stage SYPHILIS?
Help join the national effort to make him prove it, yes or no.

Donald's
Instability
Requires
Testing and
Hospitalization

**FORCE
TRUMP TO
SHOW US
HIS D.I.R.T.H.
CERTIFICATE**

He must have Syphilis.

T.T.12

The Nation Needs to Know.

Trump was relentless in pursuit of Obama's birth certificate. But was this all a cry for help?

If you look back at all of Donald Trump's online rhetoric, a peculiar pattern emerges: **Most of his posts take the shape of a firm, round, painless sore, often found around his words.** He is sensitive about his hands, but that could be due to his face's flat rosy-colored, non-itchy rash. **And after twenty years of dormancy,** his tertiary-staged syphilis-soaked mind might be enduring bouts of rage, blindness to facts, and risking dementia. **The ONLY possible explanation for Trump's behavior is advanced insane syphilis.** If not, let's have him prove it.

Join the DIRTHER Movement

The **DIRTHER Movement** is a single-issue protest, asking Donald Trump to prove he is not suffering from late-stage, brain-rotting, Syphilis. Until this issue is settled, Trump is therefore not a provably **sane** American citizen, due to lack of proof of his mental health certificate.

D.I.R.T.H.E.R. is an acronym for:
Donald's **I**nstability **R**equires **T**esting,
Hospitalization, **E**lectrotherapy, and **R**ecovery

Left untreated due to arrogance, tertiary stage syphilis is distinguished by a descent into mental illness. **WHAT ELSE could explain Trump's erratic behavior?** The facts are CLEAR. We must take Trump's own previous example to demand evidence from a president. We must demand proof. Show us his #dirthcertificate
