Fuzz-O-scope

I have a special fondness for policemen. Before you start screaming fascist pig let me explain that my father of the flesh was a fuzz. My father was one of Philadelphia's finest and worst, so I understand, pretty much the emotional-psychological background of many policemen. And to you, my hip brothers and sisters, I say start bombarding the police, your misguided and misdirected brothers and sisters, with love and real education. Confrontations on the street are a sado-masochistic game. If you are truly turned-on you know that one can only turn on another with love. To all those far out Scorpio, Pisces, Aries, Gemini, Cancer, Leo, Libra, Sagittarius etc around the zodiac chicks, fuck a fuzz for peace, ball a blind fallen brother back to enlightenment, make a convert by making it. The revolution is really being won in the grass, the hay, the sack, between the sheets. Liberated sex is the key to the revolution. Sex is sacred; from, in and takes one back to God.

RELIGION is the opium of the people. It has been used throughout history to keep people's minds and bodies enslaved. When the religious blinder is removed most people's minds are freed from tons of crud and they are able to think clearly and see things objectively often for the first time in their lives. For this reason alone we should organize to smash religion.

Emile Zola said, "Civilization will prosper when the last stone falls from the last church upon the last priest." We should begin working right now to bring this about.

One way this can be done is through education. The churches are in turmoil. Black and other Third World people are beginning to recognize the role religion has played in keeping them oppressed and are asking (and receiving) reparations. Priests, preachers and other religious lackeys are leaving the church in droves. This should be encouraged. We should recognize that religion is our enemy and preachers are potential friends. It is not enough simply to point out where religion is wrong. We should create an alternative. We should be prepared to give physical aid and comfort to religious defectors. We should strive to create chaos in the ranks of the enemy and community in ours.

A good way to start is by organizing an atheist group. This is very easily done and can be set in motion simply by saying that a group exists. It is helpful to have an address so that others may contact you. This is important because often atheists are totally isolated and to start with a 'group' may only have one or

two people doing all the work. If you don't want to use your home address, get a post office box.

The next step is to let others know that there is an atheist organization so they may help or at least learn what atheism is and why you think that religion is the syphilis of human progress. This can be done by publishing some sort of literature -- probably a leaflet since you'll most likely be giving it away and you'll want to keep the cost down. Printing should be no problem. You can either acquire your own equipment or use someone else's. Most groups have mimeographs that you should be able to borrow. Try the Unitarian Church if you can't find one anywhere else.

We've found that one of the best places to distribute literature is at religious functions, especially those of the young religious groups like the Jesus People's Army. Be prepared for a lot of static and maybe a little police harassment. It's best not to let one or two people dominate your time as you will find that is one way they can keep you from reaching a lot of people.

Another way to let people know there is an atheist group is to advertise. Probably the local papers won't take your ad but try them anyway. Some national mags have reasonable ad rates so you should try them, too.

If you have meetings try to keep them from becoming a debate club. This causes a group to become ingrown and you end up talking to yourselves. It is far better to use meetings to discuss strategy and tactics for reaching lots of people.

These are just a few ideas to get you started. If you have any questions or comments feel free to write to us. We'll try to help any way we can. In the meantime, Good luck!
